Webserver calculated the new ratings

On February, 29 a new program on the webserver calculated the ratings 2008/1, based on the rateable results reported during the second half of 2007. The process provided me with a detailed protocol for download. After a careful review I was able to release the new list and to make the ratings available to everybody on the server. After that some other download processes were necessary to create the usual pdf-file with printable lists and statistical figures, still a lot of manual work. That is the reason why this list and Eloquery come a little bit later than usual. I hope you will enjoy it though.

Our programmer, Martin Bennedik, did a great job in providing all necessary features to reorganize our way of rating calculation. Many thanks to him and also to the tournament directors and delegates for collecting and recording the results on time.

Included games

Extract of the “Tournament Rules“ - Chapter 7 - “Rating Numbers“

- 1 It is the sincere wish of the ICCF to award equivalent titles for equivalent achievement. Under the ICCF rating system each player obtains a rating based upon a method of statistical probability, calculated from tournament results over a period of many years.
- 2 The tournaments which are taken into the rating system are:
 - (a) All ICCF tournaments except thematic tournaments,
 - (b) principal zonal tournaments, team championships, master class, higher class and open class promotion tournaments,
 - (c) all such national tournaments which require a qualification from master class, as well as the final of a national championship, team championship or cup final. Based on an application from the national federation, preliminaries for a national championship may also be included,
 - (d) other individual and team tournaments including “Scheveningen” type events, authorised by the ICCF-Congress or Executive Board,
 - (e) friendly matches between countries.

Tournaments with postal or email transmission will be evaluated only if they are administrated on the ICCF-Webserver. Responsible for this task are the tournament directors and the delegates of the national federations, respectively.
- 3 Each player who has completed games in the tournaments referred to in § 7.2 obtains a rating. This rating will be published only if the player has completed at least 12 games. A rating based on at least 30 completed games is a “fixed” rating.
- 4 The rating calculation procedure would use players’ ratings as at the start of a tournament for those players with a published rating in the applicable ratings list. For newer players, FIDE ratings may be used if available, failing which a player would be regarded as having a rating equal to the tournament level.
- 5 A new rating list will be released twice each year, in which the results of games reported during the previous rating period have been calculated. The rating periods are January-June and July-December, respectively. These lists will be released on October 1st and April 1st, respectively, and will be made available on the ICCF website.
- 6 The rating list shall contain:
 - (a) the effective date (April - September and October - March, respectively),
 - (b) a list of rated events,
 - (c) the name and federation of each player with at least 12 rated games,
 - (d) the ICCF title held by each player listed,
 - (e) the current rating and the number of rated games for each player listed,
 - (f) distinguish marks for inactive players.
- 7 Players who appeared on previous lists but who do not qualify for a rating because they have been inactive are nevertheless considered currently at their most recently published rating. Players shall be considered inactive if they do not finish a rateable game in a rating period. Inactive players shall continue to be shown for five years after being considered inactive.

Auszug aus der "Turnierordnung" - Kapitel 7 - "Wertungszahlen"

- 1 Es ist das Anliegen der ICCF, für gleiche Leistungen gleiche Titel zu verleihen. Im ICCF-Wertungszahlensystem erhält jeder Spieler eine Wertungszahl, die auf der langjährigen Auswertung von Turnierergebnissen nach zuverlässigen statistischen Methoden beruht.
- 2 Die Turniere, deren Ergebnisse im Wertungssystem bearbeitet werden, sind:
 - (a) Alle ICCF-Turniere mit Ausnahme der Thematurniere
 - (b) Spitzenturniere, Mannschaftsmeisterschaften und Aufstiegsturniere in der Meister-, Hauptturnier- und offenen Klasse der Zonen,
 - (c) alle nationalen Turniere, die eine Qualifikation aus der Meisterklasse erfordern, mindestens aber die Finalrunden der nationalen Meisterschaft, der Mannschaftsmeisterschaft und der Pokalmeisterschaft. Auf besonderen Antrag einer Föderation können auch Vorrunden einbezogen werden,
 - (d) andere Individual- und Mannschaftsturniere einschließlich Turniere nach Scheveninger System, die vom ICCF-Kongress oder Präsidium genehmigt worden sind,
 - (e) Freundschaftsländerkämpfe.

Turniere, die per Post oder Email gespielt werden, können nur dann ausgewertet werden, wenn sie auf dem ICCF-Webserver verwaltet werden. Verantwortlich dafür sind die Turnierleiter bzw. die Delegierten der nationalen Föderationen.
- 3 Jeder Spieler, der Partien in Turnieren gemäß § 7.2 beendet hat, bekommt eine Wertung. Diese wird nur dann veröffentlicht, wenn der Spieler mindestens 12 bearbeitete Partien beendet hat. Eine Wertung, die auf mindestens 30 Partien basiert, heißt "gesicherte" Wertung.
- 4 Für die Auswertung der Partien eines Turnieres werden die bei Turnierbeginn gültigen Wertungen benutzt. Spieler, die zu diesem Zeitpunkt keine veröffentlichte Wertung haben, werden mit einem Wert entsprechend der Turnierkategorie angesetzt. Stattdessen kann auch eine gültige FIDE-Wertung berücksichtigt werden.
- 5 Jährlich werden zwei Wertungslisten erstellt, worin jeweils die in der vorherigen Wertungsperiode gemeldeten Ergebnisse bearbeitet werden. Die Wertungsperioden erstrecken sich von Januar bis Juni und von Juli bis Dezember. Die Listen werden zum 1. April und zum 1. Oktober erstellt und auf der Internetseite der ICCF veröffentlicht.
- 6 Eine Wertungsliste enthält:
 - (a) das Geltungsdatum (April - September, bzw. Oktober bis März),
 - (b) eine Liste der ausgewerteten Veranstaltungen,
 - (c) Name und Föderation der Spieler mit mindestens 12 gewerteten Partien,
 - (d) einen evtl. ICCF-Titel jedes aufgeführten Spielers,
 - (e) die aktuelle Wertungszahl und die Anzahl der gewerteten Partien jedes Spielers,
 - (f) die Kennzeichnung von inaktiven Spielern.
- 7 Spieler, die auf früheren Listen geführt wurden und für die auf Grund von Inaktivität keine Auswertung erfolgt, werden trotzdem noch als gewertet betrachtet und zwar mit der zuletzt veröffentlichten Wertung. Als inaktiv gelten Spieler, die in einer Periode keine für die Wertung in Frage kommende Partie beendet haben. Inaktive Spieler werden nach Beginn ihrer Inaktivität noch für fünf Jahre auf den Wertungslisten aufgeführt.

The Working Rules

Anwendungsregeln

General Principles

- 1 The ICCF Rating system is a numerical system in which percentage scores are convertible to rating differences and conversely, rating differences are convertible to scoring probabilities.
- 2 The basic of the system is the normal probability function of statistical probability theory. For convenience sake this function has been put into tabular form for the conversions indicated in 1.
- 3 Table of conversions from percentage P into rating difference Dp:

Allgemeine Prinzipien

- Das ICCF-Wertungssystem ist ein numerisches System, in welchem prozentuale Leistungen in Wertungsunterschiede und umgekehrt Wertungsdifferenzen in Leistungswahrscheinlichkeiten umgewandelt werden können.
- Die Grundlage des Systems bildet die normale Wahrscheinlichkeitsfunktion der statistischen Wahrscheinlichkeitstheorie. Diese wird tabellarisch für die in Punkt 1 bezeichneten Umwandlungen dargestellt.
- Umwandlungstabelle von prozentualer Leistung P in Wertungsdifferenz Dp:

P	Dp	P	Dp	P	Dp	P	Dp	P	Dp	P	Dp
1.00	677	0.83	273	0.66	117	0.49	- 7	0.32	- 133	0.15	- 296
0.99	677	0.82	262	0.65	110	0.48	- 14	0.31	- 141	0.14	- 309

The Working Formulae

- 5 For the calculation of a rating of a player who has not yet played 30 games:

$$R_p = R_c + D(p) * F$$

- R_p the rating of the player
 R_c the average rating of all his opponents
 $D(p)$ the difference in rating based on the percentage score p , obtained from item 3
 F the correction factor depending on the percentage score p in the following way:

$$F = -2 * p^2 + 2 * p + 0.5$$

- 6 The new rating of a player with a fixed rating from the previous period is calculated by:

$$R_n = R_0 + f * \sum \Delta R$$

- R_n the new rating of the player
 R_0 the old rating of the player
 f the significance factor
 $\sum \Delta R$ the summation of the rating changes in all his games during the rating period

- 7 Calculation of a change in rating after a game is made by:

$$\Delta R = k * \Delta W = k * (W - W_e)$$

- ΔR the change of the rating for a finished game
 W the actual game result (1, 1/2, 0)
 W_e the expected result of the game
 k the rating point value for a game point (or: the development coefficient)

- 8 The expected game result W_e is the percentage expectancy, obtained from item 4, based on the difference between the player's rating and the opponent's rating at the beginning of the game. A player without a published rating at that time will be regarded as having a rating equal to the tournament level (see item 11).

- 9 The development coefficient k is used as a stabilising factor in the system:

$$k = r * g$$

$$r = \begin{cases} 10 & \text{if } R_0 \geq 2400 \\ 70 - R_0 / 40 & \text{if } 2000 < R_0 < 2400 \\ 20 & \text{if } R_0 \leq 2000 \end{cases}$$

- R_0 the old (that is: the most recently calculated) rating of the player
 g_n the total number of rated games played by this player

- 10 The value of the significance factor f is determined in the following way:

$$f = \begin{cases} 1.5 & \text{if } q \geq 2 \\ (q+1) / 2 & \text{if } 1 \leq q < 2 \\ 1 & \text{if } q < 1 \end{cases}$$

Arbeitsformeln

Für die Berechnung einer Wertung für Spieler, die noch nicht 30 Partien gespielt haben:

die Wertung des Spielers
 die durchschnittliche Wertung aller seiner Gegner
 die Wertungsdifferenz aus Tabelle 3 für das erreichte Prozentergebnis p
 der Korrekturfaktor, der auf folgende Weise vom Prozentergebnis p abhängt:

Die neue Wertung eines Spielers mit gesicherter Wertung aus der Vorperiode wird berechnet mittels:

die neue Wertung des Spielers
 die alte Wertung des Spielers
 der Signifikanzfaktor
 die Summe aller Wertungsänderungen aus seinen Partien in der Wertungsperiode.

Die Berechnung der Wertungsänderung für eine beendete Partie erfolgt mittels:

die Änderung der Wertung für eine beendete Partie
 das tatsächliche Partie-Ergebnis (1, 1/2, 0)
 das erwartete Partie-Ergebnis
 der Wertungspunkt-Kurs eines Partie-Punktes (oder: der Entwicklungskoeffizient)

Das erwartete Partie-Ergebnis W_e ist die prozentuale Erwartung aus Tabelle 4, basierend auf der Differenz zwischen der Wertung des Spielers und der Wertung des Gegners zu Beginn der Partie. Für Spieler ohne veröffentlichte Wertung zu diesem Zeitpunkt wird eine Wertung entsprechend dem Turnier-Level angenommen (siehe Punkt 11).

Der Entwicklungskoeffizient k wird als stabilisierender Faktor in dem System verwendet:

$$g = \begin{cases} 1 & \text{für } g_n \geq 80 \\ 1.4 - g_n / 200 & \text{für } 30 < g_n < 80 \\ 1.25 & \text{für } g_n \leq 30 \end{cases}$$

die alte (d.h. zuletzt berechnete) Wertung des Spielers
 die Gesamtzahl der bisher gewerteten Partien des Spielers

Der Wert des Signifikanzfaktors f wird auf folgende Weise bestimmt:

$$q = | \sum (W - W_e) / s |$$

$$s = \sqrt{n * p * (1 - p)}$$

ΣWe summation of the expected game results
 ΣW summation of the actual game results
 n the number of games completed by the player in this period
 p the scoring probability obtained from item 4 for a difference in rating D between the old rating R_0 of the player and the average rating R_c of his opponents.

11 Assumed rating for a player without a published rating at the beginning of a tournament:

1800 Open class, cup preliminary rounds, international open preliminary rounds, friendly matches
 1900 Ladies' WC semifinals, ladies' olympiads
 2000 Higher class, cup semifinals, international open semifinals
 2100 Ladies' WC finals
 2200 Master class, cup finals, olympiads, zonal championship preliminary rounds, invitation (team) tournaments, international open finals

Summe der erwarteten Partie-Ergebnisse
 Summe der tatsächlichen Partie-Ergebnisse
 Anzahl der von dem Spieler in dieser Periode beendeten Partien
 Prozentuale Leistung aus Tabelle 4 für die Wertungsdifferenz D zwischen der alten Wertung R_0 des Spielers und der durchschnittlichen Wertung R_c seiner Gegner.

Angenommene Wertung für Spieler, die zu Turnierbeginn keine veröffentlichte Wertung besitzen:

2300 Masternorm tournaments
 2400 WC semifinals, zonal championship semifinals
 2500 WC $\frac{3}{4}$ -final, zonal championship finals
 2600 WC finals

For national tournaments the average of the already rated participants is assumed, maximum 2200.

For new kinds of tournaments a value shall be fixed with the announcement of the tournament.

Calculation procedure

- 12 The rating period runs from January 1st until June 30th, and from July 1st until December 31st, respectively. All results reported in this period will be eligible for inclusion on the next list.
- 13 Valid results from postal and email tournaments must be registered by the tournament directors on the ICCF-Webserver no later than July 31st and January 31st, respectively.
- 14 Players without a rating from previous periods get their first rating based on the games finished during the current period, using the formula 5.
- 15 Each player who has a rating based on less than 30 games at the beginning of the rating period, receives a new rating based on all his games. This is done with the formula of item 5.
- 16 For each player whose rating was based on at least 30 games at the beginning of the period the new rating is calculated using the formula 6, except for those players who finished more than 800/k games in the current period. For those players a new rating is calculated, based on the formula 5 only for their games in that period.
- 17 The new rating for the next ICCF rating list is rounded to the nearest integer.
- 18 Rules for the rating of games in team tournaments in which a substitute player takes part:
 - a) A game of a substitute player is only counted for his new rating if ΔW is positive for him. Otherwise the game is counted for the player who has been substituted.
 - b) For the opponent the game is counted as being played against the player (the original or the substitute) with the highest rating.
- 19 If a player who has been inactive for five years or more, starts to play again his first results will be treated as results with $f = 1.5$.

Berechnungsmethode

- Die Wertungsperiode erstreckt sich vom 1. Januar bis zum 30. Juni, bzw. vom 1. Juli bis zum 31. Dezember. Alle innerhalb einer Periode gemeldeten Ergebnisse sind wertungsfähig für die nächste Liste.
- Die wertungsfähigen Ergebnisse aus Post- und Email-Turnieren müssen spätestens bis zum 31. Juli bzw. 31. Januar von den Turnierleitern auf dem ICCF-Webserver registriert werden.
- Spieler, die bisher keine Wertung hatten, erhalten ihre erste Wertung, basierend auf den in der laufenden Periode beendeten Partien, gemäß Formel 5.
- Ein Spieler, dessen Wertung zu Beginn einer Periode auf weniger als 30 Partien beruht, erhält eine neue Wertung, basierend auf allen von ihm bis dahin beendeten Partien. Dazu wird die Formel in Punkt 5 benutzt.
- Für die Spieler, deren Wertung zu Beginn der Periode auf mindestens 30 Partien beruht, wird eine neue Wertungszahl berechnet gemäß Formel 6, außer für solche, die in dieser Periode mehr als 800/k Partien beendet haben. Für diese Spieler wird die neue Wertung berechnet gemäß Formel 5, dabei werden nur die Partien aus der laufenden Periode berücksichtigt.
- Die neue Wertung wird für die nächste ICCF-Wertungsliste zur nächsten ganzen Zahl auf- oder abgerundet.
- Regelungen für die Wertung von Partien in Mannschaftsturnieren, in denen Ersatzspieler spielen:
- a) Eine Partie eines Ersatzspielers wird nur dann für seine neue Wertung berücksichtigt, wenn ΔW für ihn positiv ist. Sonst wird die Partie dem Spieler zugerechnet, der ersetzt worden ist.
 - b) Dem Gegner wird die Partie so zugerechnet, als ob sie gegen den Spieler mit der höheren Wertung gespielt worden wäre.
- Wenn ein Spieler, der fünf oder mehr Jahre lang inaktiv war, wieder zu spielen beginnt, werden seine ersten Ergebnisse mit $f = 1,5$ gewertet.
